SUMMARY OF QUALIFICATIONS

Expert electronics maintenance technician with a total of four and a half years of experience in nuclear reactor plant operation both critical and shutdown; proficient in installing, maintaining, calibrating, configuring and troubleshooting electrical equipment used for reactor control, instrumentation, measurement, alarm warning, power distribution, and airborne particulate radiation detection; operate General Purpose Test Equipment (GPTE) and auxiliary equipment; test, calibrate, maintain, and repair electronic and hydraulic-electric systems that support reactor plant operation.

EXPERIENCE

United States Navy— *Nuclear Electronics Technician*

September 2016 - September 2022 (Six years)

- **Shutdown Reactor Operator**

March 2020 - September 2022 (Two and one-half years)

Operated a nuclear reactor during shutdown conditions to maintain pressure and temperature within requirements. Oversaw maintenance and operations within the reactor and steam plant for planned maintenance and special test procedures.

- **Propulsion Plant Operator (Reactor Operator)**

September 2019 - September 2022 (Four years)

Operated a nuclear reactor during power range conditions to maintain pressure, temperature, flow, and power within requirements. Performed numerous reactor startups and shutdowns.

- **Shutdown Electrical Operator (Load Dispatcher)**

February 2019 - September 2022 (Three years)

Controlled and monitored a variety of electrical power distribution machines to supply nuclear plant instrumentation, control, and auxiliary equipment.

HARD SKILLS

- Equipment Operator Training
- Precision Instruments
- Meter Calibration
- Codes and Standards Compliance
- Records Compilation and Maintenance
- Electronics Maintenance
- Advanced Troubleshooting
- Scheduled Maintenance

SOFT SKILLS

- Fast pace learning
- Open-mindedness
- Integrity
- Responsibility
- Discipline
- Mentoring
- Stress management
- Critical observation

- **Reactor Electrician**

February 2019 - September 2022 (Four years)

Conducted thorough inspections and operations outside of control rooms to quickly identify and address concerns. Monitored nuclear reactor equipment performance to identify malfunctions of equipment, instruments and controls and reported conditions to supervisors to promote immediate resolutions.

EDUCATION

Nuclear Field A-School, Charleston, SC

December 2016 - May 2017 (Six months)

This school provides basic knowledge of technical mathematics and a good working knowledge of electricity and electronics, solid state devices, digital logic and systems, microprocessors, and instrumentation and control circuits. Students learn to interpret schematic diagrams and use appropriate test equipment to isolate and correct faults in electronic systems.

Nuclear Field Power School, Charleston, SC

July 2017 - December 2017 (Six months)

This course provides a comprehensive understanding of a pressurized-water Naval nuclear power plant, including reactor core nuclear principles, heat transfer and fluid systems, plant chemistry and materials, mechanical and electrical systems, and radiological control.

Prototype, Charleston, SC

February 2018 - July 2018 (Six months)

This course provides knowledge of the fundamentals of a Naval nuclear power plant and the interrelationship of its mechanical, electrical, and reactor subsystems. Students develop oral communications skills. Students understand the physical nature of nuclear radiation, its detection, interaction with matter and human health consequences, and gain knowledge of the safe operation of a complex Naval nuclear power plant and its sophisticated subsystems with an emphasis on basic industrial safety principles. Students learn to identify, troubleshoot, and correct problems in nuclear mechanical, electrical, or reactor control systems at the component level with an emphasis on reactor systems, and apply earlier technical classroom knowledge gained to the practical safe operation of Naval nuclear power plants.

Electronics Technician Maintenance School (ETMS), Pearl Harbor, HI

August 2021 - September 2021 (Two months)
